

DETECT VULNERABILITY SCANNING SERVICE

Highlights

- | *Proactive identification of network security vulnerabilities*
- | *Automated scanning*
- | *Latest vulnerabilities are updated every 12 hours*
- | *Powerful internal and external network scans*
- | *Easy access to downloadable reports in just one location*
- | *Customizable scanning parameters*
- | *Unlimited scans per host are allowed*
- | *Prioritized remediation guidance*
- | *Assists with security regulatory compliance (PCI, GLBA, HIPPA)*

Detect Vulnerability Scanning Service from Easy Solutions can help secure your network and information proactively identifying security vulnerabilities before hackers take advantage of them.

Detect Vulnerability Scanning Service assists meeting regulatory requirements while building trust and confidence on online business activities. Our solution is designed to identify thousands of known security vulnerabilities, assess the risks and provide remediation recommendations.

DVS FEATURES

Regular and Frequent Scan Scheduling

Regular vulnerability scanning is critical in securing an organization's network. Even if your current software is secure, the rapid pace of upgrades creates new vulnerabilities daily. Detect Vulnerability Scanning Service provides protection against the latest threats with updates every 12 hours.

Regulatory Compliance

Detect Vulnerability Scanning Service provides historic information, reports and recommendations for appropriate risk managing procedures, which will help you meet regulatory requirements such as GLBA (Gramm-Leach-Bliley Act), PCI DSS (Payment Card Industry Data Security Standard) and HIPPA (Health Insurance Portability and Accountability).

Flexibility and Customizable Configuration

Detect Vulnerability Scanning Service offers total control of scanning parameters and frequency. Easy Solutions also offers scanning services that can be run on-demand, scheduled or continuously to meet the needs of every business.

DVS FEATURES

External and Internal Scanning

Scanning for vulnerabilities outside the perimeter firewall does not offer enough protection against current threads. In order to have a comprehensive understanding of the security environment, it is necessary to consider the internal vulnerabilities scanning every IP address, server, desktop, shared file and device on your network.

Prioritized Remediation Recommendations

Detect Vulnerability Scanning Service provides the ranking of the discovered risks and the step-by-step actions recommended to fix each vulnerability.

Automated Reports

Detect Vulnerability Scanning Service generates executive and comprehensive reports including potential weaknesses and network risks, trending and comparative analysis, proving the ROI of Easy Solutions' offering.

Start discovering and controlling your security vulnerabilities before hackers can exploit them with

Detect Vulnerability Scanning Service
