DPS FEATURES

DetectID/TA Implementation & Integration Service

DetectID/TA Implementation & Integration Services are specifically designed to maximize ROI by increasing the speed of implementation to provide strong authentication and fraud prevention services.

Easy Solutions works with the following key deliverables that guarantee a successful implementation for DetectID/TA.

- Design an implementation plan
- Identify integration point. (Web Services, ISO8583)
- Estimate current and future performance requirements.
- Build and Implement a test plan according to business requirements.
- Install and Integrate DetectID/TA in the current IT environment.
- Formulate the plan the move to production and final roll out.
- Support & Management

DetectID/TA Massive Rollout Accompanying Service

DetectID/TA Massive Rollout Accompanying Services provide the extra-hands needed by your organization to effectively manage the additional requirements related to the massive enrollment of DetectID/TA platform.

Accompanying Services include support to the end users that frequently ask for the new security services offered by your institution.

Accompanying services from Easy Solutions vary in duration from months to years depending on the business requirements of your institution.

DetectID/TA Process Design

Technology works to support the business and this is why Easy Solutions created the DetectID/TA Process Design Service that ensure the right business processes are in place to effectively manage DetectID/TA according to:

- Current Organization Culture.
- Current Business Processes already in place.
- Ensure minimum impact to end users.

DPS FEATURES

Detect Certified Training

Detect Certified Training helps to set the stage for long term success and efficiency by describing every single aspect of the technology and the business processes affected to make your organization successful from the initial deployment through the support stage.

Detect Certified Training can have an immediate positive impact on your staff and your organization.

Properly trained professionals have a broader product understanding that allows them to leverage all that they learn on what is important, avoid common mistakes, and become more effective when resolving problems and or communicating with vendor support.

Detect Fraud Assessment

The Detect Fraud Assessment from Easy Solutions provides the right service to measure the gap between the fraud management practices within the organization and the state of the art of fraud management around the world. This benchmark plus an in-depth view of the business objectives results in a detailed plan with a tactical and operational plan to close the gap and achieve the goals in fraud management.

Detect Fraud Reduction Service

The Fraud Reduction Service from Easy Solutions provides the leading tool in fraud detection: DetectTA backed up by highly skilled fraud consultants from Easy Solutions to implement a strategy to reduce fraud across the organization.

Since this service involves the implementation of DetectTA to identify fraud patterns, it's typically priced as a base fee plus a pay per protection basis which enables the institution to rapidly implement a fraud prevention strategy.
