

DMARC Compass™

Professional Services

Optimize Email Authentication

Phishing and spam email continues to compete with corporate communications for user attention. To minimize attacks on customers more than 48,000 websites have adopted the DMARC email protocol to reject or quarantine fraudulent messages.

Easy Solutions helps companies implement DMARC and determine which emails should be quarantined or rejected. Whether the security goal is increased visibility on sent emails, taking down phishing attacks, or filtering spoofed messages, Easy Solutions enables companies to communicate with customers without fraudsters intervening.

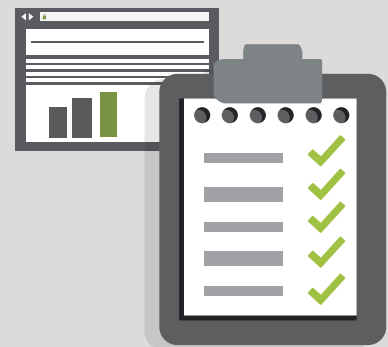

Guidance

- > Assist milestone planning to p=reject
- > Evaluate DMARC implementation options

Training

- > Reduce threats by maximizing SPF, DKIM, and DMARC protocols
- > Receive ongoing DMARC Compass portal training

Reporting

- > Understand the DMARC protocol reporting
- > Learn security insights from DMARC reports

Easy Solutions can implement the DMARC protocol and quarantine fraudulent emails in as little as two months. Contact us today at sales@goeasysol.net to get started.
